

16 August, 2016

Dear Sir/Madam,

Letter of Reference – Mr Tony Attenborough

Osmoflo employed the services of Mr. Tony Attenborough as Design Manager for the 35,000m³/day sea water desalination plant proposed for Southdown Magnetite JV, Western Australia.

Tony commenced with Osmoflo in 2011 leading the concept design, technical proposal development and client technical negotiations. Tony's leadership and experience contributed towards Osmoflo becoming the final proponent in the client tender process. Unfortunately, the project did not proceed as a result of the declining commodity price of iron ore and the subsequent impact on project finance for the overall project development.

An additional benefit of having Tony act as the Design Manager was his coaching and mentoring of the engineering design team. Osmoflo is completely satisfied with the services provided by Mr. Tony Attenborough and would be happy to recommend him for similar assignments in the future.

Kindest Regards,

Mary Kanavoutsos

Mary Kanavoutsos
Major Projects Manager
